

- **Company:**

Spudweb is a 16 years old company which is into IT enabled infrastructure products and started a technology division in 2009 which caters to heavy engineering & new products development and specialized in value engineering and finite element analysis.

- **Challenge:**

Looking for CAD software which can provide both Design & Simulation Solutions

- **Key Benefits:**

- Return On Investment
- Less Learning curve
- Inbuilt ease of use analysis tool
- Reduce no of prototypes
- Design time reduced by 30%
- Optimization helps in reducing material cost

***"SolidWorks results matches Theoretical & Practical aspects and it is the user friendly 3D CAD with integrated Analysis solution".***

**Mr. Venkatesh –Technical Director**
