

- Company:
  - Nu-Tech Industrial Spares and Services (P) Ltd.
  
- Challenge:
  - To design and manufacture various typical components for Windmills with less number of prototypes .
  
- SolidWorks Benefits:
  - 2D to 3D conversion
  - Good to view the results in e-drawing without CAD software
  - Standardization of existing drawings into DIN standards
  - Reverse Engineering
  - Simulation for product validation
  - Minimize design errors
  - Theoretical and practical results are satisfied

**Nu-Tech manufacture and supply windmill components to established OEMs and other end users**

*“SolidWorks is an effective tool which removes obstacles in design process from concept to product realization and it does wonder ”*

Mr. P . Ramalingam  
Director-Design, Development & Business Planning
