

PROJECT PLANNER 3DEXPERIENCE ROLE

COMPLEMENT SOLIDWORKS WITH INTEGRATED PROJECT MANAGEMENT ON THE CLOUD

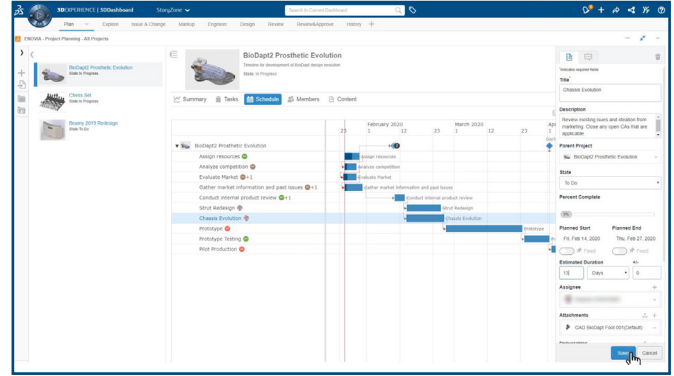

Deliver innovative products on time and on budget by connecting your SOLIDWORKS® design data with all project members, tasks, deliverables and communications.

OVERVIEW

Project Planner is an intuitive solution for project planning, execution and monitoring on the cloud-based 3DEXPERIENCE® platform. Working in a flexible and secure collaborative environment, Project Planner helps teams accelerate the time from idea to delivery. Project Planner helps your teams collaborate through a task-specific file repository and activity stream, and stay on track with real-time summary charts.

KEY CAPABILITIES

- Automatically optimize schedule to meet project constraints and resources. Improve teamwork by breaking projects into more manageable task sets and delivering real-time notification of schedule changes to all team members.
- Graphical views let you easily monitor and edit the project schedule. You can leverage tasks and milestones along the Gantt chart timelines, creating dependencies and modifying information as required.
- Secure your projects with flexible access rights management that enables the project owner to select who can view and edit tasks, guarding access to stored content, including CAD data and documents.
- Readily track a deliverable's status by receiving notifications when tasks or milestones are past key dates, and viewing critical and past due tasks via color-coded charts. Team members can communicate using embedded comments, preserved for traceability.
- Easily manage related content at both the project and individual task level, storing and sharing files through 3DDrive and creating and managing collaborative spaces with 3DSpace.

CAPABILITIES OF THE 3DEXPERIENCE PLATFORM

With its growing solution portfolio and secure cloud technology, the **3DEXPERIENCE®** platform enables you to manage all facets of your product development process while reducing infrastructure costs, IT overhead, and software maintenance and complexity. All **3DEXPERIENCE** solutions work together seamlessly, making project management, data management, sharing and collaboration easy. Project Planner can take advantage of the following platform capabilities:

- View, share, annotate, discuss and manage content from anywhere, at any time and on any device.
- Collaborate with all internal and external team members through cloud-based dashboards, messaging, activity streams, communities and drag-and-drop task management.
- Create, save, duplicate, delete, exchange, lock and manage designs securely, sharing only what you want and controlling what other team members can do with design data.

Our 3DEXPERIENCE® platform powers our brand applications, serving 11 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the **3DEXPERIENCE®** Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 250,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.
