

FAST FACTS: 3DSWYMER

Connect teams and facilitate real-time collaboration among your most valuable contributors through dashboards and communities to build a framework for sustainable innovation.

- 1 Securely connect all users in the value stream.** Foster innovation by removing silos and uniting design, engineering, manufacturing, sourcing, sales, marketing and supply chain partners into social communities for secure collaboration.
- 2 Create a personalized user experience.** With an intuitive dashboard and app widget structure, users can customize their workspace to maximize information access and productivity.
- 3 Deploy immediately, scale flexibly.** Cloud deployment means organizations can get up and running quickly without the need for costly IT support, and can easily scale up and add apps for design, simulation and manufacturing as their business needs grow.
- 4 Enhanced multimedia collaboration.** Make design reviews more impactful and efficient with the ability to share multiple media types (video, images, PDFs) as well as screen sharing for both audio and video calls.
- 5 Explore 3D designs without CAD.** View, annotate and measure the assembly components from anywhere, at any time and on any device to maximize design understanding and collaboration without the need for a CAD license.

“We wanted to have one common environment—a single place for everyone to work. That’s what the **3DEXPERIENCE** platform is helping us to achieve. It’s allowing us to integrate the entire product development process, from quotation through to production and breaking down silos and improving communication.”

– Mariusz Sobocinski, IT and business analyst director, Nowy Styl

“Many of our customers already use the platform, and they’re very impressed we’ve invested in the same tool. It will allow us to share information, technical parts and drawings, in a matter of seconds, to resolve design issues and keep projects on track. We do not know today what we will create tomorrow, but we can create every day the conditions to imagine it.”

– Marco Mazzarolo, CEO, Viraver
